

2018 Annual Environment Conference **Nov. 13 - 14 — The Gideon Putnam**

Frank DeOrio

Senior Technical Manager
O'Brien & Gere

Mr. DeOrio is a Subject Matter Expert/ Senior Technical Manager for OBG. He has been the technical lead for numerous complex projects in a variety of environmental and regulatory settings. He has been responsible for the selection, installation, and operation of both physical-chemical and biological industrial and municipal treatment systems, including Biological Nutrient Removal (BNR), Enhanced Nutrient Removal (EBR) systems, metals precipitation, and organic contaminant removal via adsorptive and destructive techniques.

He provides project teams across the company with technical and subject matter expertise and leadership for treatment technology selection and design – specifically concerning nutrient removals, and perfluoroalkyl and polyfluoroalkyl substances (PFAS/PFOS) as well as other emerging contaminants. He provides staff mentoring in his areas of expertise, and assists with internal technology transfer training along with the organic growth priorities for OBG.

Frank is a graduate of Syracuse University and studied Biochemistry at Cornell University. He has been with OBG for 11 years and prior to joining OBG Frank was the Director of Municipal Utilities for the City of Auburn, NY
