

# Renewable Energy Conference

*A Leadership Forum on Energy Policy*

**Tuesday, June 25 - Wednesday, June 26, 2019**

**Marist College, Poughkeepsie**

## About the Conference

Don't miss the Premier Renewable Energy Conference on the East Coast. "Green New Deal" or "Green Dream" New York State and the Nation's energy policy is being defined either by aspirational vision or unachievable prattle. It's time to explore the long term goals of 70% Renewable, 100% Renewable, Net Zero Emissions, and Zero Emissions, while evaluating, Renewable Energy Breakthroughs, the Electrification of the Economy, the Public Service Commission's Reforming the Energy Vision (REV), New York's targets for Off-shore Wind, Battery Storage, the Value of Distributed Energy Resources, Natural Gas Moratoriums, the role of the Modern Utility, Pricing Carbon into the Wholesale Market, and the impacts of a highly-engaged Federal Energy Regulatory Commission. The conference will examine the impact of these policy changes on the competitive bulk electric market place with associated impacts on the use, development, and pricing of renewable sources of supply.

The Conference will kick off with a Welcome Reception on Tuesday, June 25. On Wednesday, June 26, you will hear from leading experts in the field of energy, technology, academia, government policy and business. The format of the Conference will allow you to learn, meet experts, and ask questions on issues most important to you. Morning sessions are devoted to establishing a foundation for understanding the current status of the energy market place. Afternoon sessions will focus on the practical experiences of professionals working in these emerging energy markets, and there will be plenty of opportunity for networking.
