

Skillup® AMP

Finding a skilled workforce can be challenging. It is equally challenging for job seekers to know which skills employers are looking for to fill specific positions.

Skillup® AMP is an online tool to solve both of those challenges in the information technology (IT) and manufacturing sectors.

For Employers:

Workforce Survey

Get started by sharing your recruitment and professional development challenges.

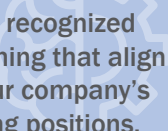

Candidate Matching

Based on your desired skills, find candidates taking courses in our system.

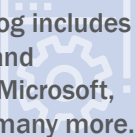

In-Depth Consulting

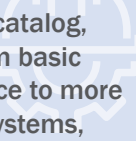

Looking for help? We can meet with you to design hiring and training solutions.

Choose the industry recognized credentials and training that align with positions in your company's IT and manufacturing positions.

The extensive IT catalog includes hundreds of courses and certifications by IBM, Microsoft, Cisco, CompTIA, and many more.

In the manufacturing catalog, the courses range from basic safety and maintenance to more advanced electronic systems, robotics, and Lean Six Sigma.
