

The Business Council of New York State, Inc.'s
FY 2027 One House Budget Summary
Updated January 12, 2026

Dear Members,

The following document is a detailed, issue-by-issue review of Governor Hochul's SFY 2027 Executive Budget (all budget documents are available at [New York State Division of the Budget](#)). As we have done in past years, we will update this chart throughout the budget process to show Senate and Assembly proposals and the final budget agreement. The proposed budget would spend \$260 billion overall, including federal funds (up 0.7% this year), with state tax-and-fee supported spending at \$157 billion, up 5.7%. Cutbacks in federal funds are being offset by continued strong state revenues, especially the personal income tax. Overall, state tax receipts in the current fiscal year are expected to be up by \$11 billion, or more than 10 percent, with continued but lesser (4.2%) tax growth projected for FY 2027. Major spending items continue to include primary and secondary education (\$39.3 billion, up 4.3%) and Medicaid (\$38.2 billion, up 11.4%). The new budget also proposes a \$1.7 billion increase in childcare spending, to be funded in part by a projected \$2.4 billion end-of-year surplus for FY 2026. The Governor's proposal has a limited number of policy initiatives, but they include pro-growth reforms to environmental reviews for projects including housing, water and sewer infrastructure, and other project categories. However, it also extends "temporary" higher tax rates on business, imposes new taxes on nicotine products, and proposes additional regulations and mandates on energy utilities. As always, we welcome your questions and input as we continue to analyze and respond to the Governor's budget proposal.

Transportation – Joseph Alston

ISSUE	EXECUTIVE BUDGET	SENATE ONE HOUSE	ASSEMBLY ONE HOUSE	FINAL BUDGET
-------	------------------	------------------	--------------------	--------------

<p>Stop New York City's Super Speeders through Intelligent Speed Assistance</p>	<p>This bill would define an intelligent speed assistance device as a device which is installed in a motor vehicle and utilizes technology to limit the speed of the motor vehicle to a city-determined level above maximum posted speed limits. This bill would further authorize the City of New York to set parameters for the pilot program, including the number of speeding violations that would result in mandated installation of such device and procedures for removal of such device. The bill would also require any pilot program to have regulations for monitoring compliance, a list of approved devices, and providers for installation of devices. This bill would also provide for penalties for noncompliance with such devices.</p> <p>TED - Part D</p>
